

Are You Getting The Most From Your Large-Format Printer?

Scan-To-Copy. Scan-To-Print. Scan-To-E-Mail...

Most manufacturers design products to address a single application. Multifunction products allow you to address more opportunities with a single device than any other. Although multifunction devices are mainly utilized within the small-format segment, we ask ourselves: "Why not large-format output?"

Welcome To The Digital Age

Select Canon large-format printers are now available with the ColorTrac Scanner System. This complete workflow solution provides a powerful scan-to-copy/file/e-mail integrated system for fast and effective large-format capture-to-output, allowing you the flexibility to grow your business while maximizing investments. Copying, archiving, or distributing maps, CAD drawings, posters, or documents is now simpler, quicker, and easier than ever before. The wide spectrum of applications that can be addressed with the solution include:

SCAN-TO-PRINT

Documents with color renderings can be scanned and reproduced with high quality. Color users include the following:

- Research and development departments
- Design departments
- Architectural
- GIS and Mapping for Civil Engineers
- State and local government agencies (sewer, water, tax planning, engineering, etc.)
- Technical support
- Product planning
- Utility companies
- Schools and universities

SCAN-TO-ARCHIVE:

Opportunities exist in such industries as manufacturing companies, utility companies, state and local government agencies, and many more. Many government agencies are now scanning their files not only to avoid loss of data due to catastrophes, but to save space as well. Scanning applications include:

- Scan-to-file in TIFF, PDF, or JPEG
- Production scanning for archiving
- Scanning into ISIS format for document/data management systems
- Color scanning at exceptional speeds

SCAN-TO-E-MAIL

Scan a document and e-mail it to an off-site location with one click of a button.

- Scan and send documents either as PDF, TIFF, or JPEG with one button
- Easily share customized documents with various off-site locations

Complete Out-Of-The-Box Solution

This complete imagePROGRAF® large-format solution includes all components necessary to save scanned images, distribute them electronically, and print them quickly and accurately. The tools needed to create, process, and print large-format output are included, no matter what the application or skill level of the user.

SOFTWARE

- **SmartLF** – This “ready-to-run” software is easy to use and designed for operation for a novice user. Select the File, Copy, or E-mail function, the type of file to be scanned, and a few other intuitive settings. Then place the original in the scanner and off it goes!

SOFTWARE

- **CopySmart** – This software creates a multifunction scan/copy/print system, maximizing investment and the utilization of the equipment. Advanced options include de-noise, step & repeat, thresholding, black/white point adjustment, individually adjust color bars, add text and highlight boxes, and thin line black enhancement.
- **PosterArtist** – All Canon scan-to-print solutions include the creative software that comes with an imagePROGRAF printer. Create stunning prints right out of the box with software that’s designed to put your ideas on paper. Scan documents and import them into PosterArtist to create custom posters.
- **HDI Driver**

HARDWARE

- **imagePROGRAF Printer***
- **ColorTrac Scanner**
- **Desktop Workstation (server, monitor, mouse, keyboard)**
- **Universal Reprographic Stand**
